

KATADYN MINI - the smallest water filter

PRODUCT CHARACTERISTICS

Technology:	Pump filter, ceramic depth filtration (0.2 microns = 0.0002mm pores)
Effect:	Eliminates bacteria, protozoa, cysts, algae, spores, sediments and viruses in combination with particles greater than 0.2 microns.
Output:	Approx. 0.5 l/min
Capacity:	Up to 7'000 l depending on the water quality
Weight:	Approx. 210 g
Dimensions:	18 x 8 x 5 cm
Guarantee:	2 years
Material:	Plastic, silicone, ceramic
Accessories:	Prefilter and carry bag
Article No.:	8017684

Series: Ultralight

FACTS

- The right choice for users whose top priority is minimum weight and size.
- Ideal for stays in hotels and short trips.
- For clear water. The Mini can also filter cloudy water, but then needs to be cleaned more often. With increasing resistance, clean filter immediately. Use Katadyn Pocket or Combi for longer periods of use.
- The tried and tested ceramic depth filter removes bacteria, protozoa and other disease-causing agents. The principle: The micro-organisms cannot pass through the mini pores of the filter ceramic (0.2 microns) because of their size (greater than 0.2 microns = 0.0002 mm).
- Unlike disposable filters, the ceramic can be cleaned many times - even in the field.

PRODUCT CHARACTERISTICS > BENEFITS

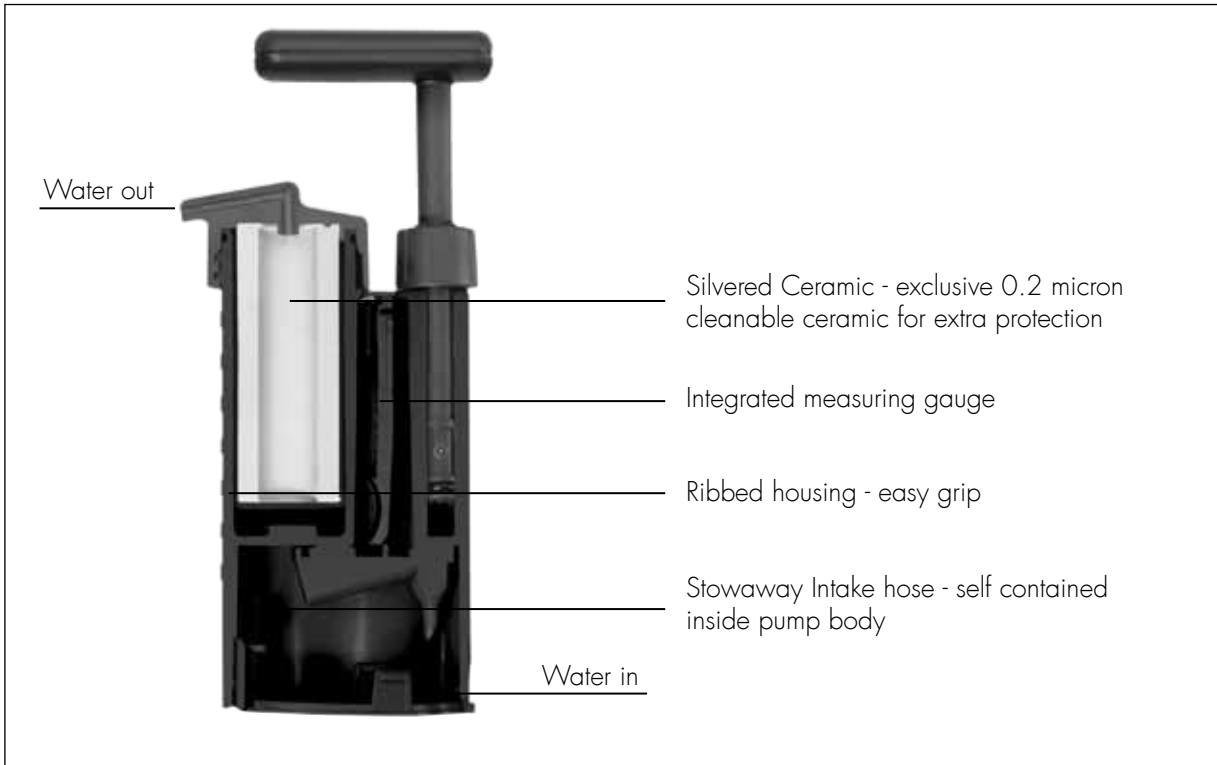

- The smallest portable water filter > there's space for it anywhere
- Minimum weight > great comfort
- Cleanable filter ceramic > filter can be used after cleaning (no disposable filters)
- Few movable parts > simple maintenance
- Capacity of up to 7'000 liters > long life with minimum use of spare parts
- Measuring gauge supplied > indicates when the filter element should be changed

SHORT PROFILE

Compact filter with minimal size and weight. For city tours, day trips, hiking. For 1 person.
